But not only the first part of this year will be favorable to earn more and to see some projects realized but also its second part with Jupiter in Gemini and in transit in the third astrological sector. Do not underestimate the positive energy of this very important year because in addition to being able to consolidate everything you have achieved in the past, you will be able to restart with new projects and reach other goals and successes by the end of the year. At the level of your inner life, the lesson that this period wants to give you and that comes from the Master Saturn, planet of time, is to know how to assume, in every sphere of life, one's responsibilities, to evolve, to put aside childish attitudes and that do not allow you to mature but to move forward with the awareness that only by evolving you will reach new heights, new heights of your professional career but also private, family, sentimental. It is necessary to rediscover and cultivate the balance between mind, body and spirit that you may have overlooked.

**And if you have ascendant in ...**

**Aries:** a good year to really reap a lot after sowing over the past year. Do not give up and in the first 5 months continue to work hard to achieve further satisfaction. With Jupiter in Gemini you will also be physically very well and it would be useful to start a new hobby.

**Taurus:** an excellent period to strengthen the body and to reach good levels of awareness is the one concerning the first 5 months of the year while with Jupiter in Gemini you will be able to harvest for what you have sown in the past months. Good time for love with opportunities to meet your soul mate.

**Gemini:** great year especially in reference to its second part with Jupiter passing on your zodiacal ascendant but also passing in sextile with your natal Sun. Be careful, however, to assume your responsibilities and also to mature in love without neglecting the needs of the person you love.

**Cancer:** in the first 5 months of the year you can get good results in the workplace thanks to the sextile of Jupiter but also to the transit of Saturn from the zodiac sign Pisces which is also favorable for your ascendant. Great opportunities to consolidate everything you will achieve but the road will be very hard.

**Leo:** This zodiac ascendant limits a little the potential of a year that could be fabulous for you. Pay attention to your physical shape, do not overdo it with too tiring and dangerous sports and do not underestimate any discomfort. Also stay away from bad nutrition and vices such as smoking and alcohol.

**Virgo:** a great year if we consider its first part but afterwards everything could get worse. If you want to achieve good results in every area of your life and especially in work and in love, then commit yourself between the months of January and May 2024 with Jupiter in trine to your zodiacal ascendant.

**Libra:** excellent time for work with a daily life that flows in a serene way but the greatest satisfactions will come in the second half of the year with Jupiter in Gemini which will therefore be positive both for your natal Sun and for the zodiacal ascendant. Great deals coming after June.

**Scorpio:** physically you have to be very careful especially in the first 5 months of the year due to the opposition of Jupiter to your zodiacal ascendant and it would be good not to neglect any physical ailments. The second half of this year will still be inexpensive in almost all areas of your life.

**Sagittarius:** trying to reach goals, goals will not be easy in this period due to Jupiter who will be in Gemini from June and therefore opposite to your zodiacal ascendant, also creating the conditions for not being so physically well. Do not give up on love but also know how to be satisfied with what comes.

**Capricorn:** with Jupiter and Saturn very favorable it is about reaching very interesting goals and feeling really satisfied. In every sector of your life, joys, pleasant events can happen, but the first part of the year will be more beautiful with Jupiter in Taurus while subsequently her transit in Gemini will be less profitable.

**Aquarius:** difficult the first part of the year, rather tiring both physically and at work and in some cases even sentimental due to Jupiter in quadrature but the sky is definitely brightened around the month of June with the arrival of Jupiter in Gemini. This will be a time of rebirth for all of you for sure.

**Pisces:** the first 5 months are excellent because Jupiter will be in Taurus but beware of

that Saturn who asks you to be very responsible, particularly severe even with yourself as well as with the situations you will experience. With Jupiter in Gemini it is also necessary to evaluate unfavorable changes that can affect love and work.

## TAURUS

**Love Taurus 2024:** still the planet of luck in your zodiac sign for the first 5 months of the year but what is really interesting is that subsequently its transit in Gemini will allow you to be even happier. In fact, this is a year divided into two parts, one in which to sow again, try to continue a journey started last year, the other in which you can finally achieve some satisfactions. All this reverberates on your love life in an absolutely positive way as finally many of you will find the right person to have by their side to embark on a path together. Here it is a question of meeting your soul mate and by the end of the year to already start thinking about a coexistence, a marriage, a life together with the support of the Saturn sextile that will really make you much more responsible than in the past. . The best times to get to know someone because you will have a very evident erotic charge, will be those in which Mars will be in Capricorn from 5 January to 13 February 2024, in Pisces from 23 March to 30 April 2024, in Taurus from 10 June to 20 July 2024 and in Cancer from September 5th to November 4th 2024. So many months to be able to meet someone, perhaps to have various love relationships before meeting your soul mate who will be absolutely compatible with you. Obviously if you are already experiencing a love story this is a year of strengthening the relationship and in which to make a thousand plans for your future. If you have not yet married, if you are going to live together, if you want to have a child, then this period is absolutely useful to achieve all this. Believe in love this year and lay the foundations for a romantic relationship and family that could truly be rewarding for years to come. Don't underestimate seemingly mundane encounters that could give birth to a great love. Passion on the rise.

**Job - career - money Taurus 2024:** on a professional level it is about starting new paths, abandoning old situations that no longer offer you what you want and proceeding towards new paths that are much more rewarding and that you have probably already undertaken during the last months of last year or that you have thought about in that period. Now is the time to materialize your thoughts and actions and make choices, make decisions that will positively change your working life over the next few months and even years. If you no longer like the job you currently have, don't be afraid to change, to accept other professional proposals, to abandon what is no longer rewarding for you to start new exciting adventures. If you are very young this can be a very lucky year to find a satisfying job but also to continue studying, to take exams, to win competitions, to carry out very advantageous questions. A diploma, a degree, a certificate relating to a course you have attended, will be the visiting card to be more appreciated in the world of work which will offer various opportunities for all of you. By the beginning of the summer you should be quite happy with the path you have

taken but we must not forget that the efforts made have required a lot of money. In fact, the first 5 months are a continuation of the last months of the old year in which you sowed. Still 5 months of sowing to finally see the goal on the horizon when Jupiter transits into Gemini, exactly from the end of May 2024. In fact, during the second part of the month many of you will finally be able to reap the fruits of hard work, making choices and decisions, reaching very interesting social positions and also earning very well. Ideal period for a real estate sale, to invest a sum of money in the purchase of new tools useful in the work. Great chances.

**Luck - fitness Taurus 2024:** to better understand how you will all be physically, morally, psychologically and if you are quite lucky during this year, we must evaluate the transit of Jupiter of course but also that of Mars. In the meantime, let's say right away that the best periods in terms of physical form will be those in which Mars will be in the earth zodiac signs and exactly in Capricorn from 5 January to 13 February 2024 and in Taurus from 10 June to 20 July 2024 but also when it will be in Pisces from March 23 to April 30 2024 and in Cancer from September 5 to November 4 2024, it will be about living very creative periods, full of super energies, of many intuitions and that desire to express qualities, talents, merits that have remained hidden. , dormant within your heart, your mind. A very amazing sky for almost the whole year with moments of great fatigue because let's not forget that Saturn in Pisces is positive but will often ask you to sweat, to work hard to reach the set goals. For many of you great events are expected, lucky, unexpected events that could affect any sector of your life considering that that Uranus is always in your zodiac sign and wants to renew, upset certain situations. These are inevitable changes but which will be positive in most cases, thanks to the support of Jupiter and Saturn. The best time to travel for business but also for fun is the second half of the year. Physically we have indicated what times of the year will be full of energy but do not waste your resources on a thousand projects, focusing instead on a few projects but which will be absolutely achievable by the end of the year. Sport, a healthy diet, the removal from some vices to which you have been enslaved perhaps for years, will allow you to be reborn morally, internally as well as physically.

**Love** ★★★★★

**Luck and fitness** ★★★★★

**And if you have ascendant in ...**

**Aries:** wonderful year in which you can really do a lot of things, take initiatives both in the business and economic and sentimental sectors, especially in reference to the first part, while with Jupiter in Gemini you will be able to recover physical energy, also cultivating a hobby or doing new sports.

**Taurus:** excellent the first 5 months in which you are supported not only by Jupiter but also by Saturn which is in Pisces. Your romance will be waning but you will acquire more sense of responsibility in the sentimental sphere and in the family. In short, this

is a year in which many of you will evolve internally.

**Gemini:** a rather pleasant moment that concerns the second part of the year with Jupiter in Gemini and that allows you to be more optimistic and have more confidence in yourself as well as recover energy after a rather complicated period. After June you will feel that you are new and different people, more serene.

**Cancer:** giving up love is not possible for people as sensitive as you are and among other things also very attractive. This heaven favors opportunities to meet someone who can make your heart beat faster but you have to put aside that sense of lightness and superficiality that certainly does not go well in love.

**Leo:** wonderful the second part of the year while in its first part unfortunately you will be forced to resist even meeting some slight difficulties, some annoying situation not very easy to solve. Negative conclusion of agreements and perhaps a love separation but new opportunities will come soon.

**Virgo:** the transit of Jupiter unfortunately cannot do a lot with Saturn in opposition to the zodiac sign Pisces but certainly the first part of the year favors work and falling in love even if it will not be easy to keep what you have obtained in the following months with Jupiter in Virgo and Saturn always opposite.

**Libra:** we must not be too pessimistic but not even believe that we are immortal. This seems to be a year in which you have to be able to satisfy yourself without asking too much of destiny to avoid taking steps backwards rather than steps forward. Work and love opportunities are coming in the second half of the year.

**Scorpio:** supported by the planet Saturn which is in Pisces you will be able to live a fairly peaceful, calm year, without major events. Jupiter is opposed to your ascendant sign but forms a conjunction with your zodiac sign, with the natal Sun and therefore it will be taken away but also offered in some cases.

**Sagittarius:** your astrological combination is absolutely not negative but certainly the second part of the year, with Jupiter opposite the ascendant and the contemporary square of Saturn, will not help much to realize certain projects that perhaps will have to be re-evaluated and neglected in some cases.

**Capricorn:** well the working sector that enjoys good stability and also the economic one that enjoys excellent security. This is still a year in which to sow and harvest a lot without being distracted because Saturn asks for awareness of your qualities and the objectives to be achieved, without getting too distracted.

**Aquarius:** during the first 5 months of the year you have to be attentive to some choices to make, to some decisions to make, avoiding making mistakes because if you avoid creating mess and confusion in your working and economic life, then the second part of the year, with the trine of Jupiter, you will be much happier.

**Pisces:** good time for you, a moment of strong awareness of the qualities you possess and that you can reach and of great inner serenity that will allow you to mature and evolve further and already with the beginning of the year we are convinced that you will get immense satisfaction. Likely love at first sight also in love.

## GEMINI

**Love Gemini 2024:** a year absolutely to remember because Jupiter arrives in your zodiac sign after about 12 years even if not immediately but only around the end of May 2024. Meanwhile, its transit for the first 5 months of the year still behind you can help you solve some problematic in the sentimental field, perhaps to find a right solution with a partner with whom you are separating or with whom you are trying to find a better complicity. If you are alone this new year promises to give a meeting but in our opinion also more than one that will inflame your heart, will make you absolutely very well predisposed towards people and you will be attracted by the physical but also by the inner beauty of the person you will meet. Let's say that for many of you the first months will be disappointing on a sentimental level and you will probably not be able to be calm, you will experience moments of melancholy and loneliness that are absolutely deleterious for you since you are still used to having fun, smiling at life and being in among the people. Things will definitely change in the second half of the year and therefore you must not be discouraged, you must not be sad but think positively. The best periods in which thanks to a renewed charm you will be much more sensual and attractive, are those that see the transits of Mars and exactly the period with Mars in Aries from May 1st to June 9th 2024, in Gemini from July 21st to September 4th 2024 and in Leo from November 5th until the end of the year. So the positive months are many and in fact we are almost convinced that lonely hearts will have many opportunities and not just one to meet people compatible with them. As for the people who already have a man or a woman to love by their side, the situation will improve significantly from the month of June and it will be possible to start making plans together such as thinking about living together, getting married, having a child or move to a new home.

**Job - career - money Gemini 2024:** your professional path improves markedly with the arrival of the second half of the year as Jupiter will be in your zodiac sign after about 12 years and will allow you to finally express your innate qualities, your strengths and qualities, reaching interesting goals also before the end of the year. However, starting from the beginning of this year with Jupiter behind and Saturn in quadrature with the zodiac sign Pisces, we must be very careful not to ask too much but to know how to be satisfied, without making utopian projects that may not find the support of anyone. Jupiter in the twelfth house however works like a parachute, like a lifesaver and every time you find yourself in difficulty professionally and even economically, you will be able to find an escape route, someone who can help you, a person who will allow you to get you out of trouble. With the arrival of Jupiter in Gemini you will be very well prepared to start new professional paths, to undertake

new studies even if you are no longer so young and you want to change path, abandon an old job to start a new business. Changes of cities, relocations and even changes of duties within your own company or office with an atmosphere that can improve with some colleague with whom you have created differences in the past. It must be said, however, that Saturn in quadrature will be very heavy to digest and will make everything very tiring, all very uphill and there will be many moments in which you will think you have made wrong choices, to go back, to abandon everything. We must not give up because this is the year of revenge and it does not matter if it will be very tiring, if it will require a lot of expenses, a lot of economic investments because the results, the harvest you will have, will repay you for everything you have lived. If you are looking for a job the opportunities arrive from the month of June but you have to be prepared.

**Luck - fitness Gemini 2024:** having Jupiter behind, therefore in transit in the twelfth astrological sector can be a very valid ally to support a period that physically but also morally could be really heavy, tiring because of Saturn in Pisces, therefore in quadrature with your natal Sun. We must not give up being happy but undoubtedly the first months of the year will be rather tiring and with the energies in sharp decline despite good transits of Mars. Jupiter is a parachute however and in every complicated situation you will face it will allow you to find the right escape route. Definitely better the second part of the year 2024 with the planet of great luck finally after 12 years in your sky. If you have experienced a disappointing winter but also a spring on an energetic level with some discomfort, slowly things will improve and you will feel stronger, more and more creative and optimistic, with greater confidence in what you want to do. Excellent time to undertake trips even very far away and not only for professional but also for personal reasons, for fun. Recovery from any ailments, an improvement in general health and treatments, positive therapies also thanks to the wonderful doctors you will meet on your path. When Jupiter returns to your natal Sun it is also an important year to give up in vice, to finally say enough to a situation that oppressed you for many years and that made you slaves, such as vices such as alcohol, smoking, addiction. linked to gambling. We conclude by saying that in some moments you will need to heal your spirituality because of that Saturn that will constantly ask you to mature, to evolve, to perceive the lessons of life, the defeats as well as the victories, as moments of growth. So the advice of the stars is to do a lot of relaxation exercises, pray, find your center of gravity.

**Love** ★★★★★

**Work and money** ★★★★★

**Luck and fitness** ★★★★★

**And if you have ascendant in ...**

**Aries:** excellent time to continue harvesting if you have been able to sow well in the last year while Jupiter was in sextile to your natal Sun but the wonders never end and here is that the new transit of the planet of luck from the month of June in Gemini, will bring again many occasions in every area of your life.

**Taurus:** various positive opportunities in the workplace but also sentimental can happen from January to December and therefore for the whole year and this because the double transit of Jupiter will still be positive. Obviously Saturn in Pisces asks to know how to take responsibility, even many.

**Gemini:** good time in love if we evaluate the second part of the year and excellent job opportunities but beware of that Saturn in quadrature with your sun sign and the ascendant that lowers the immune defenses, makes you not very happy and quite melancholy. We must always try to smile at life.

**Cancer:** if you want to achieve some success, achieve something pleasant, do not wait for Jupiter to enter Gemini but work hard in the first part of the year and take advantage of Saturn's qualities to reach goals that can last over time. A mature, responsible and not very superficial love arrives.

**Leo:** your professional life seems to be in the balance at the beginning of the year with Jupiter in Taurus and even physically you will not be in good shape but it is important to say that the subsequent transit of Jupiter in Gemini will improve your life in every sector, strengthening the mood and optimism useful for moving forward.

**Virgo:** Saturn opposite the zodiacal ascendant but also in quadrature with the sun sign is not a good thing. Difficulties, many obstacles to overcome, many opportunities to give up instead of moving forward, a lot of tiredness and the risk of entering a state of melancholy and depression from which it will be difficult to get out.

**Libra:** unfortunately it is not easy to face the first part of the year in which you are probably thinking about some changes to be implemented which however do not arrive. Everything will change in the second half of the year with a splendid trine of Jupiter to your zodiacal ascendant and the smile will return to your lips.

**Scorpio:** a rather complicated moment and it could not be otherwise with Jupiter opposing your zodiacal ascendant creating moments of illusion, disappointment, daydreams that cannot be used to progress. Fortunately, the seriousness with which you will face the difficulties will be the winning weapon.

**Sagittarius:** a decidedly anonymous first part of the year, without particular events and in which perhaps only in some cases you can experience the risk of losing your job or a lot of money. Do not underestimate the professional life then and know. The second part of the year will instead be very heavy and full of not very beautiful events.

**Capricorn:** a really positive moment comes with the first part of this year 2024 because the ascendant is supported by Jupiter while after the month of June you will live every day without particular events but after having achieved various objectives and satisfactions that will allow you to move forward quietly and serenely.

**Aquarius:** do not underestimate the months from January and May which could be quite tiring both in love and in work and talking about money, with Saturn in the second house for the whole year, beware of financial investments and unnecessary, superfluous expenses. After May, physical strength is recovered and great success is achieved.

**Pisces:** a year characterized by the heaviness of Saturn on your ascendant who wants

to give you a lesson, make you learn something that will not be easy to understand. Often physically tired and perhaps with a few more ailments due to the age that is no longer very young. Don't fall into the tunnel of depression but smile at life.

## CANCER

**Love Cancer 2024:** beautiful year for all of you considering the first 5 months with Jupiter in Taurus and Saturn in Pisces. Speaking of love we must say that these months are absolutely good to consolidate your romantic relationship by taking it to a more responsible level. In fact, Saturn in trine asks you to be more mature, to make important choices in relation to your love life and not to be afraid to grow, to mature together with the person you have at your side. If your love story has been going on for many years then here it is about making a fundamental, more responsible choice such as going to live together or getting married but if you have to take this step it would be better to move by the end of May when still Jupiter will be your very valid ally and will be in trine with Saturn, strengthening the union of love, allowing you to achieve great emotional stability. As for the second part of the year, the one with Jupiter in Gemini, therefore behind you, it is only a question of not underestimating some misunderstandings, some moments that will not be easy to bear. We have not talked about the most passionate moments you will experience which will be those with Mars in Pisces from March 23 to April 30 2024, in Taurus from June 10 to July 20 2024 and in Cancer from September 5 to November 4 2024. Excellent times to do the love, to enjoy an excellent libido and thus strengthen the union. But be careful with Jupiter behind you, not to turn your gaze to another person because betrayals are absolutely deleterious during this year. The periods mentioned above regarding the planet Mars are also excellent for those who are still alone and who will feel the desire, very strong, to fall in love again. The first 5 months are the ideal ones to meet the right person but also simply to experience intense love stories, erotic adventures that could last even just a few weeks.

**Job - career - money Cancer 2024:** good moment in the work if you commit yourself in the first 5 months when Jupiter will still be in sextile from the zodiac sign Taurus and Saturn in trine from the zodiac sign Pisces. This can be a year of great confirmations for many of you because Jupiter will be very concrete, it will offer several lucky opportunities and will allow you to change jobs, to seek new professional paths, to abandon old situations in which you are no longer able to express your best qualities. . If you are still very young and are studying, then from January to May you can brilliantly pass exams, questions, competitions, obtain a diploma, a degree, improve your culture to get ready in the world of work. You have to push on the accelerator foot in the first 5 months because with Jupiter in Gemini, the work situation will be less brilliant. Obviously the progress made up to June can be consolidated in the second half of the year thanks to the presence of Saturn in Pisces. Few but very interesting trips are foreseen, particularly useful for maturing, to strengthen your

professional path and we cannot exclude that during one of these important trips, you will be able to conclude a fundamental agreement for the next months and years, sign an absolutely lucky contract . If you are looking for a job, send your resume to many companies already at the beginning of the year and do a lot of interviews because your phone could ring really soon and make you happy. The results you obtain during this year can reverberate over the next few years and allow you to achieve further satisfactions, including economic ones. Also referring to the first part of the month you may decide to spend a lot of money to buy a house, to make a useful financial investment for your job, to buy a new car but also to sell an apartment.

**Luck - fitness Cancer 2024:** excellent sky as regards the physical form because if it is true that Saturn is always a planet that makes everything very tiring, even when it is positive as in your case being in Pisces for the whole year, it is also true that Jupiter is in eleventh house and is very favorable, giving very lucky periods and moments of great psychophysical well-being. The periods in which you will feel you have super energy and will want to fight a lot will be those that see Mars in Pisces from March 23 to April 30 2024, in Taurus from June 10 to July 20 2024 and in Cancer from September 5 to November 4 2024. A wonderful creativity, an enormous artistic power that could allow you to start a new hobby, to write, compose wonderful poems or songs, to feel fulfilled as an artist. Do not underestimate this splendid Jupiter that will be behind you in the second half of the year, asking you not to believe everything you will see in front of your eyes. If you can, travel a lot during this year but especially during the first 5 months with favorable Jupiter and Saturn because these trips, some of which could be very long, will certainly be positive to find better physical strength, a renewed inner balance and achieve high levels of satisfaction. Do a lot of sport, walk and run a lot, do relaxation exercises because the year will not be easy, it will in fact be very tiring and in some moments of it, tiredness, nervousness, could throw you into an unpleasant condition of discomfort, depression, of melancholy. If we then consider that you are really very sensitive people and even too sensitive then here you have to get help when you are rather sad. Especially in the first part of the year you will be able to solve some problems related to your health, finding adequate treatments and being followed by very competent doctors. Obviously, remove unnecessary vices.

**Love** 

**Work and money** 

**Luck and fitness** 

**And if you have ascendant in ...**

**Aries:** excellent first part of the year thanks to an excellent Jupiter that supports your sun sign but also to Saturn that supports your natal Sun. Periods of good harvest in every sector of your life and not only in the professional sector, although here you will probably achieve much more success and satisfaction.

**Taurus:** wonderful year that seems to be the continuation of the old year 2023 in which you have sown and you have also been able to reap a lot of satisfactions. During this

year if you have not given space to love then you will find the right opportunities to meet someone to love, otherwise even better and more successes.

**Gemini:** super moment if we talk about the second part of the month with Jupiter in Gemini and therefore in conjunction with your natal Sun. Physically, after a not so exciting start to the year, you can recover and feel really in good shape but beware of that Saturn who wants to impose his reading and teach you something.

**Cancer:** Excellent time to reach further milestones after having experienced a rather amazing year 2023. Now you can strengthen everything you have achieved, you can consolidate a love story and make it official or by choosing to go to live together or even get married. The work is excellent.

**Leo:** the first part of the year is not so positive due to the quadrature of Jupiter on your ascendant but this only means that you will have to be very careful about your psychophysical consideration without exaggerating with nutrition and any vices for example. Everything improves, including fitness and mood, with Jupiter in Gemini.

**Virgo:** certainly between January and May you can get interesting successes and reach positive goals in the workplace but that Saturn in opposition is really very annoying and does not leave you in peace asking you to become more and more responsible and to take on even more commitments. Some of you may not be able to resist the stress.

**Libra:** a good time for private life if we refer to the first part of the year but with Jupiter in Gemini it will be the professional sector that will be most benefited. In fact, enjoy the person at your side without stressing yourself a lot at work because new opportunities will arrive from the month of June.

**Scorpio:** definitely a productive year but in which there will be numerous difficulties in every area of your life. Difficulties that will be more in the family, personal, even sentimental fields and which fortunately should not touch the work sphere in which rather gratifying steps forward are expected.

**Sagittarius:** surely the second part of the year will be unpleasant because having Jupiter in opposition to the ascendant indicates disappointing moments, illusions, even physical discomfort following a bad diet. If you can strengthen your body and mind early in the year, then do it.

**Capricorn:** excellent 5 months in reference to the first part of the year 2024 while subsequently you will not be so serene and happy, on the contrary you will face a rather deleterious discontent for your psychological state. Do not refuse the help of some person who can come to meet you especially in the most complicated moments of your life which will probably take place in the second part of this year which requires sacrifices, a lot of commitment and taking responsibility but who will be able to give a lot.

**Aquarius:** a good period in relation to the second part of the year with Gove in trine with the zodiacal ascendant but also the first 5 months you will be quite satisfied with the results you will achieve. Love is not easy to live with but even in this sector you will have your chances if you create it before others.

**Pisces:** the heaviness of Saturn is felt not only in relation to the physical but also to the assumption of great responsibilities that must not be rejected. Surely you will be able to reach some important goals in the first part of the year but with Jupiter in Gemini everything will become more complicated and you will have to settle.

LEO

**Love Leo 2024:** this phase of the year for you and as regards the feelings is divided in two and depends very much on the position of Jupiter, as that of Saturn in Pisces, is not very engaging from a sentimental point of view. Jupiter is still in quadrature in the first 5 months of the year 2024 and if you have not yet closed a love relationship, if you have not yet suffered a sentimental breakup, then soon you will have to take this step forward, take this decision especially if with your partner the situation is irritating, depressing, unsatisfying and there are no solutions on the horizon. Obviously a reconciliation is always possible in the least cases thanks and also thanks to the arrival of Jupiter in Gemini which with your zodiac sign will form a splendid sextile. A surprising event could be about lonely hearts but particularly in the second half of the year. Among your friendships, someone with whom you can start a love story may take over precisely because the transit of Jupiter in the astrological sector of friendships indicates this. Do not be too childish but assume your responsibilities already at the beginning of the love relationship if you want it to last several years. The best times of the year to attract someone, to be very seductive, magnetic are those who see Mars in Aries from May 1st to June 9th 2024, in Gemini from July 21st to September 4th 2024 and in Leo from November 5th until the end of the year. . If you are alone you will really have many opportunities for revenge after experiencing a bad year 2023 and a start of the year 2024 certainly not favorable in love. For all those who have lived a very complicated sentimental relationship since last year and have entered a phase of crisis, if separation has been avoided, Jupiter will be a valid ally to regain harmony, serenity and a better awareness than from the past. mistakes can only be learned.

**Job - career - money - Leo 2024:** interesting moment also for the job but obviously in reference to the second half of the year when Jupiter will be positive. The influences of Saturn in Pisces and the eighth house could be instrumental in making a very important purchase. The eighth sector is in fact the sector of money bleeding but also of great earnings but considering the presence of Saturn, you will probably have to spend a lot of money to buy a useful tool in your work or to better adapt the professional environment to your needs. Be careful not to make any missteps in the first 5 months with the square of Jupiter because the greatest risk could be not only that of losing a lot of money but also of losing your job. You have to have your feet firmly planted on the ground, not believe everything you are told, not to have useless illusions and castles in the air. Solid and concrete we must be and not dreamers. Stay away from some people who will want you to do deals, agreements, will want you to sign contracts under deception. Underestimating these people could mean paying the consequences in the second half of the year which should instead be a period of recovery, of great

rebirth after a rather dark and not very productive period. With Jupiter in Gemini from June 2024 you will finally be more serene, more optimistic and able to attract small and large opportunities to you not only for work but also for income. Trying your luck in a new city, in a new place other than where you usually live or work can be a winning weapon. If you are without a job, do not be afraid because by the end of the year, thanks to your commitment, many opportunities could really come. Studying is essential when Jupiter passes positively and therefore waiting to receive a job offer, study, even if you are no longer very young. Obviously the students will be benefited.

**Luck - fitness Leo 2024:** this is definitely not the best year for you because anyway Uranus is still in quadrature from the zodiac sign Taurus and with Jupiter in the same zodiac sign until the end of May 2024, it certainly will not be able to bring pleasant events, indeed you will probably be forced to live events unpleasant such as the loss of a job, an involution in the professional sector, a major economic loss, a romantic separation, a divorce from a business partner. Fortunately, the planet Jupiter leaves the zodiac sign Taurus to reach Gemini and here life will begin to smile at you and with difficulty you will be able to recover, to find the smile on your lips, to achieve various satisfactions. As for the physical, certainly the first part of the year will be very stressful, debilitating, particularly tiring to sustain with waning energies, especially with Mars in Aquarius from February 14th to March 22nd 2024 and in Taurus from June 10th to July 20th 2024 Do not underestimate these periods in which the drop in energy will be very evident as you risk not being able to rise again later even when Mars is positive and Jupiter enters Gemini. Important trips to do only in the second part of the year and in any case do not forget to always find time to rest, to take care of your body and your mind because between January and May you will be severely tested by fate in many areas of your life. . Consistent weight loss or weight gain due to poor nutrition is possible with Jupiter in Taurus and you must be very careful to avoid vices that could worsen your health. With Jupiter in Gemini you may feel within you the desire to do various sports, to start dedicating your free time to a new hobby or you will feel the need to better express gifts such as generosity and altruism towards others grow within you.

**And if you have ascendant in ...**

**Aries:** nice moment for all of you in reference to the second part of the year that will give you what you could not have during the first 5 months of this year but also during the last months of the old year. Therefore a period of great rebirth in which to feel more serene and ready for battle in every sector.

**Taurus:** you take advantage of the presence of Jupiter in Taurus still until May 2024 and try to avoid making too many mistakes because if it is true that the transit of Jupiter into Gemini will still be good, according to this planet, achieve greater satisfaction in

the first part of the year . Very passionate loves on the way.

**Gemini:** Jupiter transits on your zodiacal ascendant in the second half of the year bringing greater strength, greater sense of security and also allowing you to recover lost opportunities in the past. Surely your morale will be very low at the beginning of the year but even if we start badly we are convinced that 2024 will end well.

**Cancer:** nobody likes being alone and for you in particular, very sensitive, passionate, seductive and romantic people, it is important to have a person by your side and here finally during this year there will be interesting opportunities to make your dream come true. 'love. Lightning-fast encounters.

**Leo:** with this configuration between the Sun and the zodiacal ascendant you will suffer especially in the first part of the year and you have to be very careful not to make too many mistakes, not to overestimate yourself and not to believe too much in some people who will make promises that they absolutely will not be able to keep. Be cautious.

**Virgo:** that Saturn in opposition to your zodiacal ascendant does not help a lot and does not allow you to be efficient in various areas of life, especially at work. Much better in the second part of the year but Saturn remains in Pisces and therefore know how to have your feet firmly planted on the ground and do not be utopian.

**Libra:** this cannot be a great year because Jupiter and Saturn are not in excellent positions both with respect to the sun sign and the zodiacal ascendant but at least in the second part of the year Jupiter which forms a sextile with your natal Sun brings greater vitality, sense of security and a lot of optimism.

**Scorpio:** you have a lot of confidence in your qualities and in this sense you are right as Saturn helps to consolidate many goals you have achieved. Too bad for the first part of the year, for the first 5 months in fact, which will be tiring and will give less fruit but with Jupiter in Gemini everything will improve.

**Sagittarius:** Jupiter will not be kind to you on a physical level especially in the second half of the year as by passing through Gemini he will form an opposition with your zodiacal ascendant. We must not be too optimistic, too exuberant and we must stay away from useless illusions in which we risk falling.

**Capricorn:** if we analyze the astrological sky then we must say that from the month of January to the month of May you can reap a lot of satisfactions, be particularly happy, cheerful, lucky and reach those goals that you may have set yourself a couple of years ago. Jupiter in Gemini does not bring much news.

**Aquarius:** an excellent moment with Jupiter in Gemini that allows you to be reborn in the second part of the year and after having suffered the uncertainties and disappointments in the first part of this 2024 with Jupiter in quadrature with both the zodiac sign and the ascendant. Not an easy year but in which you will be able to be reborn.

**Pisces:** super time for work and great responsibilities with that Saturn flying over your zodiac ascendant. It is not an easy period for the physical forces, for your interiority

because Saturn wants something from you and among what he wants we also find a lot of effort, a lot and very hard work.

## VIRGO

**Love Virgo 2024:** with Jupiter in Taurus the first part of this year will be less complicated to live in love but certainly that Saturn in opposition will not be easy to deal with. If you are living a rather complicated, agitated, nervous relationship with this Saturn it will be very difficult to find a valid solution other than to separate, to break the love relationship to feel more free. In fact, what you will risk suffering during this year will be a strong sense of constraint, that is, you will not bear the responsibilities, you will not be able to reach levels of complicity useful to carry on your love relationship. Before the situation can get worse and that is when Jupiter leaves the zodiac sign Taurus, make your choice and if you understand that your love relationship can no longer offer what you want, then choose for a definitive separation. You will be alone but you will finally feel free. Not all couples will obviously be forced to separate but what is certain is that we will have to face a very critical phase with the partner. If you are looking for a new love it goes without saying that this year could be very stingy with opportunities but the best times to try to attract someone to you will be those with positive Mars and that is in Capricorn from January 5th to February 13th 2024, in Taurus. from 10 June to 20 July 2024 and in Cancer from 5 September to 4 November 2024. The month of April will certainly be the most complicated to live in love with Mars in Pisces that will meet Saturn and both opposite to your natal Sun will create very conditions criticism and in which it will not be easy to remain calm. In this period, many romantic relationships could therefore reach the end of the line, the end of the story. The second part of the year if you are left alone, is less tiring, because, among other things, you also know how to live alone.

**Job - career - money Virgo 2024:** a really complicated period also in the work because we remember that the influences of Saturn are often much more important than those of Jupiter. Fortunately, however, during the first months of the year Jupiter will be supported by Uranus which is in Taurus together with the planet of fortune and here in the professional field it is likely that you can make small even if tiring steps forward. Certainly the advice of these planets is not to undertake new professional paths, not to leave workplaces to try new paths and new unknown roads that will almost certainly not lead to improvements but unpleasant situations. Unfortunately, some of you will have to deal with the loss of your job, especially in reference to the second half of the year when Jupiter will no longer be a support. Losing your job if you are very young is not a big problem but if the age is very advanced then the situation becomes much more complicated. However, during this difficult year there could be interesting opportunities but which must be carefully evaluated in order not to soon find yourself disappointed, heartbroken, melancholy. Even in the economic sector this is not a very

profitable year and indeed many expenses are expected, some of them even really exaggerated and financial investments, including real estate, confused, unclear, must be avoided. Do not conclude agreements, do not sign contracts if you are not really sure of the people in front of you and do not think of solving old problems that have dragged on from last year, with ease. You will probably arrive at a moment in your life in which you will avoid responsibilities, you will not want to mature, to evolve but you will witness your involution which can be very worrying. The month of April is really critical for work but also for money. Do not abandon old ways even if you are not happy because now you just have to resist.

**Luck - fitness Virgo 2024:** one of the most tiring months of this year will be that of April in which Mars will be opposite together with Saturn with which it will form a conjunction. A time when you will be very sensitive, really irritable, nervous, agitated and whatever happens to you that is not pleasant for you, will only make the situation worse. Other very heavy periods on a physical, mental, psychological level may happen but it is necessary to understand that in difficult moments you have to pull the hat out of the hat and that is your best qualities and qualities to fight and not to give up. In fact, the trouble is not wanting to face battles, letting go and making everything worse. If you are not sure what to do then ask for help, advice, support from those people who love you and who could certainly shed light on your existential path. Subsequently, after the initial storm relating to the first 5 months, Jupiter will transit in Gemini, exactly in your tenth zodiac sector, the sector often connected with your professional career and with your mother. The loss of a job with the always opposite Saturn or a radical change in your mother's life or in your relationship with her, should not bring you down. Pray a lot if you feel this need and ask the Universe to find the right energies to start again because obviously you can start again anyway. To avoid too stressful journeys on a physical level and it would be much better to avoid extreme sports, too dangerous because we remember that Saturn is in tune with the bones, that joint problems, therefore the risk of small accidents, of distractions while driving the car , are very likely. A very destructive year for some of you and therefore beyond prayer, if useful, let yourself be followed by a good psychologist. Saturn wants something from you and you don't have to be afraid to sacrifice a part of your life to smile again in the future.

**And if you have ascendant in ...**

**Aries:** a very good year to carry on certain personal, professional and sentimental situations. If you are a freelancer your customers should increase while if you work within a company you will be able to reach excellent levels and feel more appreciated by others.

**Taurus:** undoubtedly you have to push on the accelerator foot in the first part of the

month and not in its second part in which that Jupiter will not be easy to manage by passing through Gemini and forming a square with Saturn in Pisces. Period in which it is necessary to mature a lot and leave superficiality alone.

**Gemini:** if you have experienced a critical past year in terms of physical fitness then you must wait until the second part of the year to be able to recover. The work is satisfying throughout the year and you can start with various projects but don't give up on your love life that you may have underestimated.

**Cancer:** spectacular start of the year that is nothing more than the continuation of the old year 2023 but in which you can collect even more. If you are not distracted then reach unthinkable goals and even losing the support of Jupiter from the month of June, you will be absolutely very well prepared for further successes.

**Leo:** few satisfactions between January and May but with the arrival of Jupiter in Gemini you will be much more serene and you will reach a good physical shape that will allow you to be gratified by the results achieved and for which you have sown so much in the past months . Don't underestimate a love match.

**Virgo:** a great year even if the heaviness of Saturn will make itself felt very much in various periods of it. Great responsibilities to be accepted both in the professional and sentimental, family and private spheres. You must not give up because Saturn wants to challenge you and you must be stronger than everything and everyone.

**Libra:** the second part of the year with Jupiter in Gemini is very interesting but thinking about the first part of this 2024 it must be said that working life is quite interesting and you can sow to harvest in the second part of the year. Various opportunities coming up for those looking for work.

**Scorpio:** the astrological sky is favored by the transit of Saturn which is in Pisces but beware of the quadrature of Jupiter to the ascendant sign that does not allow us to be so serene. In the workplace, we must be careful not to underestimate occasions in which, due to some error, we risk taking steps backwards.

**Sagittarius:** with Jupiter in Gemini after June 2024 you will not easily be able to reach levels of satisfaction both in love and at work also because the square of Saturn will continue throughout the year. So keep your eyes open, know how to be satisfied with what will come and do not ask too much.

**Capricorn:** a complicated moment in the second part of the year with Jupiter not very efficient in Gemini but the rest of the year is lucky enough if you commit yourself and if you believe above all in yourself, in your innate qualities. We must not give up on love life and rather think about an important step to take in love.

**Aquarius:** an astrological configuration that is not ideal and that foresees moments of emotional fragility alternating with moments of great joy and in which thanks to your innate creativity you will be able to achieve various objectives. Beware of expenses, be careful not to make financial investments that are absolutely to be avoided.

**Pisces:** Saturn opposite to the sun sign and conjunct the ascendant. Not even the transit of Jupiter in Taurus will be able to help you during this which is perhaps one of the

most difficult years, in which you will have to fight a lot to achieve minimum satisfaction but above all in which you will risk taking enormous steps backwards like shrimp.

## LIBRA

**Love Libra 2024:** Saturn passes in your sixth astrological sector for the whole year while Jupiter and Uranus are together in Taurus in the first 5 months, both passing through your eighth astrological sector. Speaking of love, these transits do not confirm a period so beautiful and full of emotions to live but if you are living a sentimental story and you are living with the person you love, then here is that Saturn could improve daily life, within the four walls. and help you achieve excellent levels of awareness, responsibility, maturity. The relationship with the other person will perhaps be less based on fun and superficiality but on a very constructive complicity. Know how to always be yourself in love but offer the right space and time to your partner so that he too can give you what you deserve. In short, this year Saturn wants to test you and if the love relationship has been going on for a few years then the time has come to dare, to act, to take a step further by starting a coexistence or taking on more responsibilities. Less passion, less eros but a more renewed and profound encounter of two souls who know very well where to go together. Analyzing this astrological sky instead in relation to lonely hearts, therefore to people who still have no one by their side, the advice of the planets and stars is to seek love in a relationship with a very mature person, not very superficial, very responsible. The best times to be more attractive and therefore win someone's heart are those with Mars in Aquarius from February 14th to March 22nd 2024, in Gemini from July 21st to September 4th 2024 and in Leo from November 5th until the end of the year. Do not be afraid to step forward because according to these transits you will find yourself several times in front of a person that you will like very much and that you will have to woo as only you know how to do and if a disappointment arrives it will not be a problem.

**Job - career - money Libra 2024:** great sense of responsibility in this period because Saturn will transit throughout the year in your sixth astrological sector. The work environment will perhaps become less fun, very strict, hard to live but the results you can achieve will be quite satisfying. In fact, however, considering the not so excellent position of Jupiter in Taurus together with Uranus, this year will not be so beneficial on a professional and consequently economic level and you will absolutely not have to panic but think in some moments of discouragement and uncertainty. that you will live. If you will be able to be satisfied with your current job, with what you already have, if you will be able to give up utopian projects and will go ahead with determination without hoping to achieve great goals, then you will live a peaceful, even happy year, in which small achievements will allow you to smile. and to move on. Do not underestimate money, pay attention to expenses and it would be better to avoid bank

loans, make economic investments, buy a house but almost certainly many of you, considering the transit of Saturn in the sixth house, will have to face a renovation, an arrangement within the four domestic walls. Jupiter does not favor the arrival of a new job but her position in the first 5 months in the eighth house suggests a lot of money coming, perhaps following a bereavement and therefore an inheritance or a win at some gambling . Certainly with Jupiter in Gemini much more professional opportunities could come and those who are looking for a job will be able to find the right path. However, you have to know how to be satisfied because this year is not amazing but inside you will feel the desire to study more, to start attending courses of studies that are also very difficult to achieve a greater awareness of your incredible gifts. Few trips for work but really important.

**Luck - fitness Libra 2024:** Saturn is very heavy all year round and having Jupiter and Uranus in the eighth house certainly doesn't help. Unfortunately, physical fatigue will make itself felt and it will not be small, creating moments of depression but above all of tension in some cases, with the presence of Mars. We must therefore try to remain calm and avoid weighing down the body by paying attention to nutrition and avoiding too dangerous sports because we do not forget that Saturn refers to bones, joints as well as teeth. If you are not happy, however, you must not think that you cannot achieve happiness and remember that often in the darkest moments, you can be able to find that light that can make you resurrect. The most complicated periods both physically and mentally will be those with Mars in Capricorn from January 5th to February 13th 2024, in Aries from May 1st to June 9th 2024 and in Cancer from September 5th to November 4th 2024. Subsequently Jupiter transits into Gemini, exactly from the end of May 2024 and passing through the ninth sector of the zodiac, it will ask you to isolate yourself more often from the rest of the world and to rediscover that balance between mind, body and spirit, which is essential to face new challenges that are not always easy. Many of you will also feel a strong need to pray, to rediscover that bond with God that can be more nourished. Maybe in the eyes of other people you will be less sympathetic than in the past but certainly much more mature and aware of your qualities. Luck will remember you in the second half of the year because the trine of Jupiter will bring various positive, advantageous events and in addition to this you can feel physically even much better, taking back the reins of your life. If you intend to travel for business purposes then with Mars in Leo from November to the end of the year you can move to places that will allow you to strengthen your inner self.

**And if you have ascendant in ...**

**Aries:** with this astrological configuration certainly the best part of this year, the one that will bring satisfactions and results in the work and economic but also sentimental fields, is the one that starts from the month of June to reach the month of December. So many months to cultivate your dreams and make them come true.

**Taurus:** the professional sector is positive in the first part of the year while with Jupiter in Gemini from June 2024 the psychophysical condition will be able to improve and by feeling good about yourself and more optimistic, you will be able to reach further levels of awareness and other achievable results.

**Gemini:** giving up the love life is not something you usually do because the current sky promises to be very fascinating for seductive encounters, certainly full of magnetism and a very high erotic charge. Second part of the year to restart with new professional projects.

**Cancer:** this year's sky favors work but disfavors the physical and mental condition especially in reference to the first part of the year while with Jupiter in Gemini from the month of June, everything can be more rewarding. Do not give up because Saturn offers very useful energies even if it requires a lot of effort.

**Leo:** a fairly negative start to the year and with very few chances of reaching those goals you have set for yourself but with the arrival of Jupiter in Gemini and therefore in trine with the sun sign and the ascendant sign, you will be able to be reborn, you will find that determination that will allow you to achieve great goals.

**Virgo:** a wonderful time to feel loved especially in relation to the first part of the year and subsequently you will be able to work hard and despite some dissatisfaction and a great psychophysical fatigue, you will be able to reach the end of the year rather satisfied with the results achieved.

**Libra:** The sky is kind to all of you in the second half of the year when Jupiter forms a wonderful trine with your natal Sun and zodiacal ascendant. New opportunities, clear recovery after a difficult moment and a lot of love that can enter your life if you believe in it.

**Scorpio:** a year that shouldn't give too much satisfaction considering the transits of the planet Jupiter but looking at the position of Saturn that will be in Pisces for the whole year, we can confirm that those few results you will achieve will be amplified and will bring a lot of joy to your heart and in your mind.

**Sagittarius:** an absolutely good sky but only in part as when Jupiter is in Gemini it will become a little ambiguous due to its trine to the natal Sun but also to the opposition to the zodiacal ascendant which could lead to a drop in physical energies, to a general weakening certainly not benevolent to you.

**Capricorn:** some situation that is not very pleasant to deal with but in general here we are facing a year that is not so complicated and rather cheerful, lively, full of interesting encounters if we talk about love. If you are looking for a job, work hard in the first 5 months with Jupiter still in transit in Taurus.

**Aquarius:** beautiful moment in love and in work but in reference to the second half of the year when Jupiter will form a splendid double trine with your natal Sun and with your zodiacal ascendant. A great rebirth, many opportunities to demonstrate your innate qualities and a great love to come.

**Pisces:** this kind of astrological configuration confirms that also this year it will be

rather unfavorable on a physical level due to Saturn in transit in Pisces, therefore in conjunction with your zodiacal ascendant. You will also likely be much quieter and will love being alone more often.

## SCORPIO

**Love Scorpio 2024:** absolutely not an easy year for you because of the double opposition of Jupiter and Uranus. Unfortunately, the sentimental sector is also affected by these two oppositions but fortunately that of Jupiter lasts only until the end of May 2024. Obviously, very important crises must be foreseen with your love partner and it will not be uncommon to see separations, very abrupt sentimental breakups that will create really annoying situations to be solved even for many months later. If your love relationship is not in crisis then you can consider yourself very lucky people but be careful not to underestimate misunderstandings, partner dissatisfactions, moments of distraction and confusion and obviously stay very far from betrayals that could be the first cause of a future separation. If you leave during this period, the following months, with Jupiter in Gemini, will be less annoying to live, you will feel freer and particularly serene even if you are alone but by the end of the year we are sure that you will be able to win the heart of a ' other person because Uranus still helps to always upset the love life throughout the year. Certainly thinking of meeting the right person, a soul mate will not be easy but you will never lose hope. Do not make life plans together with your romantic partner during the first 5 months because things may not go very well and you would be disappointed. In fact, having Jupiter and Taurus in opposition creates situations in which making bad choices is very likely and it would be better to think a lot before taking the longest step of the leg. Remember that during this year you will certainly become more aware of yourself, more mature, more responsible thanks to the very important support of Saturn from the zodiac sign Pisces and therefore these qualities that will be improved will allow you to face every love situation in the right way for you. and for the person you love.

**Job - career - money Scorpio 2024:** very bad the first 5 months of this year because with Jupiter and Uranus in Taurus the risk of facing breakdowns in society, the loss of a job, various unpleasant changes in the professional sphere and even large economic losses, is really very evident . We must keep what we have sweated for in recent years without asking too much of destiny and avoiding deluding ourselves, thinking about utopian projects because disappointments could really be very important during the first part of the year. Obviously when Jupiter has transited into Gemini you will feel freer, less tired and mentally you will be able to recover optimism and greater self-confidence but if you think you can reach important goals and have considerable financial successes then you are wrong as everything will still be very complicated and however, we will have to be satisfied with the crumbs that reach the end of the year. If you have a good job obviously the climate inside the place where you usually work will not be exceptional but you go ahead, know how to resist also because Saturn in

trine from the zodiac sign Pisces gives maturity, a great sense of responsibility and the power to evolve despite the not an easy period. Do not make very expensive financial investments at the beginning of the year but also during the entire 12 months of 2024 and do not buy a house. If you are forced to sign an agreement, a contract, get someone who is more competent than you to follow to avoid bad surprises. Unfortunately, various legal, judicial, bureaucratic situations that you have not been able to fix in the last year, will probably continue to make you sleep well at night but some solutions could arrive by the end of the year with the new transit of Jupiter in Gemini. If you haven't had any problems with justice, with lawyers or with fines to pay, then it is very likely that you may fall victim to some of these situations.

**Luck - fitness Scorpio 2024:** needless to say that this can be one of the worst years for you because Jupiter and Uranus in opposition can be very deleterious and not allow you to be serene. Fortunately, Saturn will be a very valuable ally and in every moment of emotional as well as material difficulty, you will be able to think well and find the escape route with a sense of wisdom that will grow more and more within you. We must not give up but we must also be very careful and avoid useless choices and decisions that could be disastrous. Do not hope to obtain advantages from destiny at least for the first part of the year and beware of an energy drop in particular in the periods with Mars in Aquarius from February 14 to March 22 2024, in Taurus from June 10 to July 20 2024 and in Leone from November 5th until the end of the year. Physical fatigue will be accompanied by a period of great melancholy, depression, emotional sadness that should not make you depressed, however, and therefore always try to find a way to distract yourself, so as not to think about the different problems, perhaps leaving for a trip and relaxing together. to some friends. Jupiter in opposition could make you gain a lot of weight and therefore stay away from a bad diet, from any vices you have such as alcohol and smoking and especially if you love spending a lot of money on gambling, it would be much better to avoid because money will also be crucial in this. period and any very substantial losses of it could worsen your psychophysical condition. The energies are recovered with Mars in Capricorn from 5 January to 13 February 2024, in Pisces from 23 March to 30 April 2024 and in Cancer from 5 September to 4 November 2024. Do not underestimate the appearance of some physical or even mental illness and go immediately from a doctor or psychologist to avoid making the situation worse. You have to be very strong and resilient during this period but you will come out winning from this moment.

**Love** 

**Work and money**

**And if you have ascendant in ...**

**Aries:** this will not be a great year and you must know how to be satisfied with what will come without expecting too much. Unfortunately, both the position of Jupiter and that of Uranus but also that of Saturn are not very positive for making progress, improving one's love life and even one's working life.

**Taurus:** in the moment for you both physically and in terms of work with a good chance of closing great deals, pursuing fruitful collaborations and realizing dreams and projects that you have thought about so much over the past months. Great vitality and creativity for all of you.

**Gemini:** the second part of the year will be slightly better because Jupiter transits on your ascendant but do not think of reaching excellent goals because things will not go so well with Saturn in quadrature with the zodiac sign Pisces. You have to be content and grit your teeth in the first 5 months.

**Cancer:** a rather positive first part of the year and in which all of you could reach excellent goals and therefore live on income in the second part of the year with Jupiter in Gemini, but which will be a support and not a block. In fact, the planet could get you out of some trouble.

**Leo:** a first part of the year not easy with the double quadrature of Jupiter and Uranus while the second part is certainly more fun and less annoying to live with progress in the work after having lived perhaps a phase starting with economic losses and various inconveniences in the professional as well as personal environment.

**Virgo:** excellent year because Jupiter and Uranus are positive but you will have to be very attentive to the physical, to the cure of any discomfort due to that Saturn which is in opposition to your ascendant and therefore weakens the body but also the mind and spirit. So don't waste too many energy resources during this period.

**Libra:** a year that definitely improves with the arrival of Jupiter in Gemini which involves improvements in the workplace but also sentimental as well as family and economic. Obviously we hope that the first part of this 2024 will not create too many difficult problems to solve even with positive Jupiter.

**Scorpio:** bad the first 5 months of this year in which you risk losing your job but also simply spending too much money in vain and being disappointed or deluded by someone and the second part of the year will not be excellent and therefore recover after the first 5 months will be nearly impossible for all of you.

**Sagittarius:** unfortunately with the arrival of Jupiter in the zodiac sign Gemini from the end of May 2024, you will suffer the opposition of her and your delusions of grandeur could collide with a very hard and complicated reality to manage. Avoid unnecessary expenses and do not believe those who make impossible promises.

**Capricorn:** excellent sky in the first part of the year with support on the ascendant of Jupiter, Uranus and even Saturn. Surely you will be able to mature, become more responsible, even be luckier and carry out various projects that will allow you to live on income in the second part of the less exciting year.

**Aquarius:** an excellent project can be carried out from the month of June when the new transit of Jupiter in Gemini will favor your progress and not only in the professional sector. After a complicated phase at the beginning of the year, luck will be with you and many situations can definitely improve.

**Pisces:** an unforgettable year in its first part in which you can really make many of

your dreams come true but do not be too late because subsequently, with the square of Jupiter in Gemini, you will be disappointed or deluded by someone or even simply by yourself. It will therefore be necessary to keep your feet planted on the ground.

# SAGITTARIUS

**Love Sagittarius 2024:** a year that does not promise to bring a lot of satisfaction in the sentimental field due to some not so excellent transits. In fact, while from the month of January to the month of May 2024 Jupiter will be in Taurus together with Uranus while Saturn will always be in Pisces, from the month of June unfortunately we will have to witness an opposition of Jupiter that could worsen your sentimental condition, creating an atmosphere unpleasant and in which quarrels and misunderstandings will almost certainly increase. Some love relationships that were already in crisis risk ending their story by the end of the year but in most cases it will be about experiencing fluctuating moments in which you will not feel understood, loved, supported by your partner but also yourself. you will not be generous and helpful with him. Go ahead very carefully and if you do not want to end the love relationship, try to take advantage of the few moments of passion to rediscover that harmony and complicity that are essential to smile again. Complicated moments and in which you really risk throwing everything away, are those with Pisces from March 23 to April 30 2024 and especially with the red planet in opposition in Gemini from July 21 to September 4 2024. Here in these days very difficult periods you will absolutely have to avoid quarrels, misunderstandings maybe even trying to stay away from the person you love if you notice that the climate is not excellent but bad. Speaking instead of new encounters, of new possibilities of falling in love for lonely hearts, let's say that this year seems to be stingy in this sense but some periods will be favorable and some love could be born with Mars in Aquarius from February 14 to March 22 2024, in Aries from May 1st to June 9th 2024 and in Leo from November 5th until the end of the year. Your magnetism will be good in these times but not so great that you can meet your soul mate, that person you fall madly in love with.

**Job - career - money Sagittarius 2024:** certainly the year that begins is not very favorable for the work if we refer to its second part in which Jupiter will unfortunately be, after about 12 years in the zodiac sign Gemini and therefore in opposition to your zodiac sign. We would have to go back about 12 years to understand what the previous opposition of Jupiter brought in the work and economic sphere but certainly, in the majority of cases, you will have suffered economic losses, you will have been deluded and disappointed by someone, maybe some collaborations will have ended. ruinously and who knows how many quarrels for professional reasons as well as bad financial investments. This year then there is an additional negative ingredient and that is that Saturn which will always be in quadrature with the zodiac sign Pisces. All those professional situations that are not rewarding and that seem to be only a chain in the foot will have to be concluded, away from you to avoid entering an even more critical

and negative phase that could also lead you into an abyss from which it will be difficult to recover. Fortunately, you can take advantage of the first 5 months in which Jupiter together with Uranus will still be in Taurus and therefore in transit in your sixth zodiac sector, a sector that allows you to facilitate life in the workplace and with colleagues to achieve interesting goals. Here you will have to sow a lot between January and May 2024 and then harvest what arrives, knowing how to be satisfied and avoiding making further mistakes, making choices and making incorrect decisions. If you don't have a good job, however, settle for what you have and look no further, don't be fooled by people who promise to offer you paradise. Much better not to spend huge amounts of money buying a home that could be hiding some problems. Looking for a job will not be easy but the first months are good for finding various interesting opportunities.

**Luck - fitness Sagittarius 2024:** not a very easy period for all of you even on a physical level. Fortunately we must say that with Jupiter and Uranus both in transit in the sixth astrological sector, therefore in Taurus, you will be able to live an absolutely positive first part of the year and full of discrete energies, to live every day in a serene and active way and to solve even some physical problems, to find a good cure for a malaise, an ailment that has haunted you for some time. The best times to strengthen mind, body and spirit are those with Mars in Aquarius from February 14th to March 22nd 2024, in Aries from May 1st to June 9th 2024 and in Leo from November 5th until the end of the year. What is important to understand is that with Saturn in Pisces, therefore in quadrature with your natal Sun and for the whole year, it will not be absolutely easy to always feel in excellent shape and you could, in fact, have various problems related to the bones, the teeth, joints that should not be neglected at all lest they get worse. If you are thinking of traveling, be very careful also in this sector because, especially at various times when you have Mars in quadrature or in opposition, you will not feel full of energy and you will risk not taking advantage of these trips. The ideal would be to travel very little and move to places not very far away for both work and entertainment reasons. Do not neglect physical fitness as we have said before and in the most useful moments always try to take care of the body even by doing sports, feeding yourself correctly, avoiding very fatty foods, staying away from smoking and alcohol and especially in the second part of the year with the opposition from Jupiter, beware of excessive weight gain or even a decrease in it because if Jupiter can make you fat, Saturn can make you lose weight. Many of you will become more lonely, quieter wanting to avoid the company of too many superficial people around.

**And if you have ascendant in ...**

**Aries:** not an easy year for all of you unfortunately because the slow planets with their movements in the zodiacal circle will not favor the working and sentimental life. Fortunately, in most cases you will experience a year that is simply very boring and with few opportunities for fun and socialization.

**Taurus:** excellent start to the year that seems to be a profitable continuation of the one just ended, so 2023 which should have brought improvements in the workplace but also in sentimental terms and if this has not happened then you have all the first 5 months to try to achieve these goals .

**Gemini:** certainly for you the second part of the year will be less boring but we cannot say if it will actually be pleasant or tiring or disappointing. This is because Jupiter moving into Gemini forms a conjunction with your ascendant but also an opposition with your natal Sun. So be careful.

**Cancer:** definitely a rather favorable year to carry on commitments, collaborations, contracts, to start new professional paths, to find a satisfying job but you have to push on the accelerator foot especially in the first part of the year with positive Jupiter, Uranus and Saturn.

**Leo:** the contemporary quadrature of Jupiter and Uranus from the zodiac sign Taurus is absolutely very unpleasant to live and the risk is to make some mistakes, to get distracted, not to reach the set goals but with the second part of the year the climate can improve and be particularly useful.

**Virgo:** a good time to carry on some personal or work projects that you started during the last year because even in this beginning of the new year Jupiter and Uranus are absolutely positive while Saturn opposite to the ascendant creates discomfort on a physical level, perhaps some discomfort that however it can be solved.

**Libra:** an ambiguous year in which perhaps the second part will be better but which will not give you what you want for some very particular reason, perhaps for some perspectives that you had set for yourself but which unfortunately cannot be put into practice, realized. Don't lose heart but keep going.

**Scorpio:** a bad sky thinking about the first 5 months with Jupiter and Uranus opposite to your ascendant and that will make you fall into a bottomless ravine from which it will be difficult to climb. Be careful not to commit crimes, do not be superficial and seek advice from someone if you are unsure of your actions.

**Sagittarius:** A complicated year in which thinking of reaching goals that you have set for yourself will be rather impossible. Saturn in quadrature is very heavy and then comes, from the month of June, Jupiter in Gemini which by opposing your ascendant will lower the physical forces and the immune defenses. Don't neglect anything.

**Capricorn:** surely the best results can be achieved at the beginning of the year with a series of positive planets with your ascendant but which must not be underestimated because in any case the level of attention must be very high. Second part of the year less pleasant to live.

**Aquarius:** if you intend to carry out some work project at the beginning of the year then you risk making a big mistake because with Jupiter and Uranus in Taurus you do not go anywhere and indeed you risk making too many mistakes. We must calm down and be attentive observers as I wait for June.

**Pisces:** bad astrological configuration especially in reference to the second part of the

year in which not only Jupiter opposite the natal Sun but also in quadrature with the ascendant while Saturn will be a big spanner in the works that will not allow you to manage every sector with serenity of your life.

## CAPRICORN

**Love Capricorn 2024:** a year that begins with Jupiter and Uranus in trine from the zodiac sign of Taurus and with Saturn in Pisces. An absolutely benevolent astrological situation also for the sentimental sector because in the meantime Jupiter can bring an important love to lonely hearts and to those who have been separated for a short or long time while Saturn can create the right conditions to make this new love relationship last a very long time, making so that it is based on a strong sense of responsibility. So many of you during this year and in particular from January to May 2024, could meet a sensitive, mature person, even older in age but certainly wiser with whom to establish a less superficial, less passionate but certainly more love relationship. engaging on a mental level. If your love story was born in the last months of last year then it can strengthen, improve further and you can even make an important decision such as going to live together, choosing the date of your wedding. This is not a year to be alone because Uranus will offer so many opportunities and in a sudden way that even the loneliest person and least determined to fall in love could fall victim to a fantastic passion. The second part of the year will be more greedy in terms of sentimental encounters but they can still come for those who have not been able to take advantage of the first 5 months. With Jupiter in Gemini and therefore in transit in the sixth zodiacal sector, you will probably meet a person you like very much in the workplace or in everyday life. Obviously, love comes for those who know how to prepare their heart towards this engine of life and who know how to create the right conditions by leaving the house and going to unusual places, perhaps different from those they usually frequent. Staying locked in the house and hoping that love can knock on your door is a simple and useless utopia.

**Job - career - money Capricorn 2024:** a year that promises to be truly exceptional for work but also for earnings. With the support of many slow planets you can achieve a lot, reach immense goals and feel very happy, peaceful with yourself. What is important to understand is that you will be able to achieve financial as well as professional successes, working alone on a single project or on multiple projects or you can collaborate with some people, still managing to assert your ideas. Great insights, a very strong sense of responsibility and a very important level of maturity that will help you to evolve continuously. Too bad to have the support of Jupiter only for the first 5 months of the year 2024 but in these months, if you work hard, you will reach priceless peaks and in the second half of the year you can also rest and enjoy the satisfactions. Freelancers can earn a lot of money, see the number of clients increase, and work on a very interesting project. Speaking of the second part of the year, we must however say that it will be absolutely positive as the new transit of Jupiter in Gemini and therefore

in the sixth astrological sector, indicates that professional life will proceed peacefully and satisfactorily. If you want to change jobs, ask for a change of job, a transfer, accept a new opportunity in another city, find your first job, then work hard in the first part of the year which will certainly be better and full of opportunities. Important trips for professional reasons and suitable financial investments, perhaps to buy a new car, a very useful tool for work. If you are very young do not be caught unprepared but study a lot, participate in competitions and exams because soon your phone could ring thanks to someone who will appreciate your skills and qualities. Moment of great professional as well as social growth.

**Luck - fitness Capricorn 2024:** this is perhaps one of the best years because while with Jupiter transiting on the natal Sun, a new phase of life begins which in any case requires a lot of commitment and sacrifices, with Jupiter instead passing in the fifth house and therefore in Taurus together with Uranus and with the support of Saturn from the zodiac sign Pisces and in the eleventh house, your life will materialize, it will be easier, you will experience very rewarding moments and your mood will be very high, with great optimism and greater confidence in your qualities, in yourself. Physically you should live a very pleasant year, recovering after past illnesses especially because you will meet good doctors and the right treatments. Do not waste this period and especially in reference to the first 5 months of the year 2024, strengthen your body, your mind and do not neglect the search for a better psychophysical balance that can involve mind, body and spirit. Any problems with justice, therefore legal, bureaucratic, family, can be solved and the solutions will be satisfactory for all of you. The transit of Jupiter and Uranus takes place in your fifth astrological sector which is the sector of entertainment and children. Here you should devote a lot of time to the relationship with your children but also to yourself finding the time to have a lot of fun, perhaps starting a pleasant hobby that can help you relax after work fatigue. Wish to have another child or to help those you already have in study and school so that they can grow up smarter. In the second half of the year you will have even more energy with Jupiter transiting in the sixth house and both the atmosphere in the workplace and in the family will be very promising. A year that you will hardly be able to forget thanks to a series of lucky events and if you thought you were not lucky, then you will have to change your mind and change your thinking.

**And if you have ascendant in ...**

**Aries:** an excellent sky awaits you during the second part of the year but having the sun sign in Capricorn you can also take advantage of the first 5 months with the support of Jupiter and Uranus from the zodiac sign Taurus. This seems to be a more positive than negative year and one in which to accomplish a lot of things that are important to you.

**Taurus:** definitely a great year in reference to the first part but what will happen according to the planets is that you will be able to cultivate in the first 5 months and then harvest in the following months with the arrival of Jupiter in Gemini. It improves physical fitness and also recovers from some discomfort.

**Gemini:** do not underestimate this year which can be full of small and big satisfactions in reference to both its first part and its second part with the new transit of Jupiter that improves the physique, gives much more energy and allows you to socialize more seen that you do not like being very much in the midst of people.

**Cancer:** the best phase of the year for you is that relating to the months ranging from January to May 2024 with Jupiter and Uranus but also Saturn absolutely positive both in the solar sign and in the ascendant. Great moments await you with very interesting goals to be achieved also thanks to a renewed commitment.

**Leo:** you have to fight during the first part of the year against some windmill that will disappear or maybe it will actually be defeated in the second part of the year with Jupiter in Gemini forming a splendid sextile with your zodiacal ascendant. A tiring but also satisfying year.

**Virgo:** with Jupiter and Uranus in Taurus you can take steps forward at a working level but speaking of Saturn unfortunately we must say that the body can suffer a lot from tiredness, from the responsibilities that you have decided to accept and therefore it is necessary to find time to rest and be able to recover energies.

**Libra:** it is not easy to live a year in which you try to do many things but the results are poor, unsatisfactory. Here this new year 2024 will be like this, absolutely anonymous and in which you will not be able to do many things, you will not be able to obtain those satisfactions for which you will also work a lot.

**Scorpio:** the first part of the year will not be easy at all due to Jupiter and Uranus in quadrature with your zodiacal ascendant which could create some annoying personal situation and even physical discomfort. Indeed this Jupiter can slow down your ascent and make you fall victim to some vice.

**Sagittarius:** surely the first thing that comes to mind is that the year will not be as you planned it because there could be numerous twists, perhaps small but still such as to create confusion inside your head and around you and in any area. of your life, love, work, money, health.

**Capricorn:** pleasant moment between January and May in which you will certainly feel physically stronger and very determined on a professional level with the desire to reach excellent levels, further goals after having reached others previously. Second part of the year more anonymous, less interesting.

**Aquarius:** excellent sky for the second part of the year with Jupiter in Gemini while the first part will actually be tiring and not very easy to deal with with an evident drop in energy and with uncertainties that will affect many areas of your life. Do not take the step longer than the leg then.

**Pisces:** you do not have to hope to be able to reach all the goals set during a year in

which the slow planets are partly favorable and partly not positive for you. If something positive arrives, you accept it while if nothing interesting arrives, you still proceed without losing hope.

## AQUARIUS

**Love Aquarius 2024:** difficult to say what could happen in love during this year because it is divided into two periods, one less fortunate and the other more interesting and satisfying. So starting from the beginning of the year it is necessary to carefully evaluate the relationship of love that you are experiencing because Jupiter and Uranus in Taurus, therefore in quadrature with your natal Sun, bring dissatisfaction, quarrels, even irreparable breakdowns and misunderstandings such as not being able to find a valid solution. Perhaps the love relationship you are experiencing has worsened since last year and now it is a matter of understanding what needs to be done, whether to try to solve everything and move on or decide to face a separation, a sentimental breakup that in most cases could be improvise with Uranus in Taurus precisely. It should also not be underestimated that the transit of these two planets takes place in the fourth zodiacal sector, the one connected with the family and who knows that some parent, brother, sister, father-in-law, daughter-in-law, brother-in-law, may have an important role in the decision to separate you from the person who love. With the arrival of Jupiter in Gemini, from the month of June 2024, if you have separated, then you will feel much better and you can even hope to meet another person to love while if you have managed to overcome the marital crisis here is that with this wonderful Jupiter you will smile again and the relationship will certainly improve. If you are alone, the year is divided in two for you too. A first part in which there will be passionate encounters but the spark of love will hardly light up and indeed you could encounter many illusions and disappointments that will fill your heart with enormous melancholy and sadness. Obviously with Jupiter in Gemini it is very likely that by the end of the year you will be able to have a very pleasant and lasting meeting with a person who will be fun and cheerful like you.

**Job - career - money Aquarius 2024:** even on a professional and economic level this new year will not be easy and can be divided into two periods. Meanwhile, the year starts very badly with serious difficulties in finding a good job if you are left without or to feel satisfied with what you have. Jupiter in Taurus and Uranus always in this zodiac sign in fact create moments of great dissatisfaction, stress, enormous disappointments and even you could make various mistakes and pay damages to someone. Do not give up even if you will live difficult times and do not underestimate the costs, any bureaucratic and legal problems that will perhaps require a lot of expenses. With Jupiter and Uranus transiting in your fourth sector it could also happen that you have to spend a lot of money to buy a house and go to live alone as the climate within your family will not be excellent, rather bad. Trouble to settle at home perhaps with renovations to be carried out and various complications in the workplace perhaps

due to a climate that worsens in the relationship with some work colleague. Do not underestimate the different professional problems because when Jupiter arrives in Gemini you can be reborn but if you have created disastrous conditions then it will be very difficult to find the way to rebirth. If you are obviously without a job with Jupiter in Gemini you will be very benefited while if you intend to abandon an old job that is no longer rewarding then various opportunities for change may come, although not all pleasant since Uranus still remains in Taurus. During the second half of the year they can also improve earnings, collaborations can be more interesting and thanks to various insights you could start new professional paths that will bring considerable rewards. After June 2024 you will be much more admired and appreciated for your skills and qualities and there will be plenty of opportunities to prove your worth.

**Luck - fitness Aquarius 2024:** usually the planet that brings luck is identified with Jupiter but also other planets such as Uranus can be really favorable because they are able to bring luck in an absolutely sudden way. The trend of this new year will be in the hands of these two planets because Saturn in transit in your second sector will allow you to consolidate your earnings and also to spend your money wisely. Difficult the first part of the year with Jupiter in Taurus and therefore in quadrature and do not think that luck can be your valid travel companion, because, on the contrary, in many cases, you will also be unlucky in encountering unpleasant events that may concern various sectors of your life such as sentimental as well as work, as you have also read before. Surely with the new transit of Jupiter in Gemini which occurs around the end of May 2024, things will improve and in addition to verifying a better predisposition of the luck of luck and therefore of destiny towards you, you will notice a clear improvement in mood as well as physical and mental energies. Speaking of rather stressful periods on a mental and physical level we must remember those with Mars Taurus from 10 June to 20 July 2024 and in Leo from 5 November until the end of the year. In particular, the last transit of Mars in Leo will be very heavy and nervousness, tension, discomfort will increase in you beyond the physical tiredness but luckily Jupiter will come to support the hut. Surely the best moments of this year in which the energies will be really effective to work, have fun, travel, find yourself, a greater balance between mind, body and spirit, will be those who will see Mars in Aquarius from February 14 to March 22 2024, in Aries from May 1st to June 9th 2024 and in Gemini from July 21st to September 4th 2024. These periods will be very useful to get you out of a professional or sentimental disappointment.

**And if you have ascendant in ...**

**Aries:** if you know how to wait and not make too many mistakes during the first part of the year, then you will be able to reach and experience a second part, exactly after the month of June, certainly excellent, pleasant, full of progress and considerable satisfaction also in the field amorous, with passionate encounters.

**Taurus:** you have to push on the accelerator foot in the first part of this year with the double support of Jupiter and Saturn but also with that of Uranus. Positive agreements, fruitful collaborations that can bring not only an increase in prestige but also a lot of money and appreciation from some important people.

**Gemini:** that Jupiter that touches your ascendant in the second part of this year 2024 indicates that you can recover after an absolutely tiring and particularly complicated period that perhaps was born already in the past year. Now it's about recovering energy and looking to your future with great determination.

**Cancer:** beautiful year especially if we look at the first 5 months in which you will be supported by Jupiter, Saturn and Uranus thus managing to carry out many of your work projects or even just one but important in order to progress. Even in love you can expect very interesting opportunities, breathtaking encounters.

**Leo:** you will have to wait for the transit of Jupiter into Gemini which unfortunately only takes place at the end of May and thus you will be able to solve several problems that began in the past year. Do not underestimate money, do not underestimate expenses and do not ask too much of those who are at your side in life.

**Virgo:** first part of the year in which you can take advantage of many opportunities that will surely come if your mind is predisposed to receive new things, new opportunities. Obviously with the transit of Jupiter in Gemini you will not be so lucky but daily life will flow easily and you will feel more serene.

**Libra:** excellent moment in reference to the second part of the year in which that Jupiter that after 12 years will transit in Gemini and therefore in trine with your zodiacal ascendant, will allow you to be reborn, to be more fortunate, to recover physical energy and creativity later rather disappointing months.

**Scorpio:** in this beginning of the year you will certainly be harassed by various problems that may affect various sectors of your life and not just the work and sentimental one. We must proceed with extreme tranquility and not underestimate the work but not even some personal, family and sentimental situations then.

**Sagittarius:** little fun during a year that will not be absolutely simple because of that Jupiter that unfortunately will oppose your zodiacal ascendant from June, creating tiredness and even illusions, chimeras in your head that it would be much better to leave out in order not to find yourself in harmful situations.

**Capricorn:** trusting this Jupiter and this Uranus but also Saturn in the first part of the year is certainly a right and good thing because these planets will bring interesting opportunities to progress in your life, to achieve successes and goals for which you have worked so hard since last year.

**Aquarius:** the year is ambiguous because Jupiter moves but Uranus remains in Taurus and Saturn in Pisces. You have to be very careful about expenses in the first months of the year and then it will be possible to eventually invest money in some projects that Jupiter in Gemini can bring into your life. Desire to change something.

**Pisces:** it is not a simple year but above all from the month of June in which due to the

square of Jupiter to your ascendant and at the same time the transit of Saturn always on your zodiacal ascendant, you will be very tired, depressed, fatigued and in this state of weakness you will risk to make mistakes.

## PISCES

**Love Pisces 2024:** for you too, the year seems to be divided into two distinct moments that will lead you to experience truly fluctuating situations in love and in the family. Your luck, however, will be to have Saturn and Uranus always positive for the whole year while only Jupiter from the zodiac sign Taurus, will pass into Gemini. Jupiter and Uranus team up to allow you to have really pleasant encounters in the sentimental field. In fact, if you are alone you will have many months at your disposal to meet your soul mate and we do not speak casually because with the support of Saturn it is really about finding the right person for you and who can remain by your side for a very long time. In fact, Saturn is the planet of responsibility, of maturation and the person you might meet could have these qualities that will allow you to live a very long-lasting relationship over time. Probably this meeting can take place during normal movements or you will know a new person through the exchange of messages in the chat of some social network because Jupiter and Uranus transit in your third astrological sector, the one connected with the movements, with communications, travels, contacts, phone calls, emails. Speaking instead of all those who are already in love with someone then probably we will witness a year in which the love relationship will improve significantly and we can make plans for the future together such as going to live together, get married or buy a new house and these choices will be made as abruptly as Uranus then asks. Follow your instincts and if you know you have a person worthy of love at your side, then take your step forward without fear of having to back away. The second part of the year perhaps highlights some problems relating to cohabitation or marriage or interesting situations for lonely hearts that cannot find a soul mate.

**Job - career - money Pisces 2024:** also on a professional level this is a year divided into two periods. The first period could be very positive while the second period will actually be less interesting and with some complications also of an economic nature to face and overcome. If you are looking for a good job or you want to change what you have or you still have a great idea, a project to carry out, then take advantage of the months in which Jupiter will be in Taurus together with Uranus and both will be supported by Saturn in your sky, identifying a phase of your life in which whatever you carry out will really last over time and also bring considerable satisfaction. If you are without a job then send in your resume and if you have already done some interviews around the end of last year then who knows the phone will ring in this beginning of the new year. Students can reach very important levels of satisfaction, brilliantly pass exams, competitions, questions while those who are happy with the work they have, then they could achieve further successes, reach other very interesting goals. Even at an economic level, the first part of the year seems to be positive, both to earn and

therefore to accumulate money by achieving economic security, and to invest a share of these earnings in a large real estate or financial investment. Buying a house, a new apartment, the decision to carry out renovations inside the one you live in or to travel a lot both for fun and for work reasons, are all likely situations that can come true. Discussing instead the new transit of Jupiter in Gemini and in quadrature with Saturn in your zodiac sign, we must say that the second part of the year will be less profitable, it will perhaps involve too many expenses and a drop in earnings and some illusions in the professional field.

**Luck - fitness Pisces 2024:** obviously with Jupiter in sextile from the zodiac sign Taurus and with Uranus always in this zodiac sign of earth, you will be very favored and you will be able to reach an excellent energy level with a psychophysical condition that at the beginning of the year will be truly amazing and will allow you to work a lot during without feeling too tired. Probably the first 5 months of this year will be crucial and lucky for communications, for news, for travel, for messages and phone calls and in short, you will have to learn to communicate more. Great moments, full of energy, optimism, vitality and creativity will be those with Mars in Capricorn from January 5 to February 13 2024, in Pisces from March 23 to April 30 2024, in Taurus from June 10 to July 20 2024 and in Cancer from 5 September to 4 November 2024. Certainly that Saturn that transits after about 30 years in your zodiac sign has a very important function for you and in fact it wants to make you mature a lot, make you take on many responsibilities and make you become less superficial, more silent and also wise so that the next choices you make are absolutely fortunate and positive for the future in every area of your life. However, this year will also be tiring from a mental and physical point of view if we think about the period after June in which you will undergo the square of Jupiter which in turn will form a square with Saturn in Pisces. You must not give up, you must not let go but accept the challenges that will come and recover in the moments when Mars is positive. Bad times in which you will be very low in morale and physically destroyed will be those with the red planet in Aquarius from February 14 to March 22 2024 and in Gemini from July 21 to September 4 2024. In particular, the last transit of Mars will be deleterious because it will coincide with the position of Jupiter in Gemini. Physical as well as psychological ailments could arise in these periods and therefore do not neglect anything.

**Luck and fitness** ★★★★★

**And if you have ascendant in ...**

**Aries:** this will certainly not be a very lucky year but in which what good can come will be thanks to your sacrifices, your commitment and perhaps the help and support of a person who loves you so much. You have to be satisfied but after June some more satisfaction will come.

**Taurus:** a not very easy moment relative to the second part of the year with that Jupiter

in Gemini that could make you spend a lot of money to fix some health problem but if we look at the first part of the year then here life will smile at you and you can reach goals unthinkable.

**Gemini:** happy new year as far as work is concerned but not immediately because we have to wait for the transit of Jupiter in Gemini and that will also give better physical and mental strength but we must say that that Saturn in Pisces will make you much more silent and lonely, even rather unpleasant and not very ripe.

**Cancer:** criticizing everyone is useless when things go wrong but you have to look inside too but fortunately the first 5 months of this year 2024 promise to bring so much satisfaction that you will not have time to look inside yourself and understand what to improve your character certainly not easy .

**Leo:** an astrological configuration that confirms an unexciting year and in which few things, few events can happen. We must not underestimate the work but also the love life which however should not cause too many worries if your love relationship does not come from a past crisis.

**Virgo:** an absolutely positive year especially if you decide to commit yourself so much from January to May 2024. Basically these months are a continuation of the last months of the old year that will help you achieve what you have set in your mind about one year ago.

**Libra:** This doesn't seem to be a bad year, but not a very good one either. We are facing an anonymous year in which exceptional situations, tremendously pleasant or unpleasant events should not happen but in which you can go forward with serenity, walking along paths previously established by you.

**Scorpio:** the first part of this year is difficult with Jupiter and Uranus forming a square with your zodiacal ascendant. Maybe you will feel too tired, stressed, particularly exhausted in some moments of your life and not in tune with the world around you but soon you will feel much better.

**Sagittarius:** absolutely anonymous moment for you in which surely the second part of the year will bring various complications both in the work and sentimental fields. It will not be easy to manage your love and professional life and it will not be easy to be confident in the future but in some way we must not give up.

**Capricorn:** an excellent time to go to live together, to get married, to consolidate a love relationship or to carry out a work project you have worked on for many months, perhaps starting from last year. Now everything is feasible and you have to work hard to get to the intended goal.

**Aquarius:** a second part of the year certainly better thanks to the support of Jupiter that transits in Gemini but we must not underestimate that Saturn in Pisces that could lead many of you to spend too much, when it is not necessary to waste money. If you are hesitant in the workplace, you are making a big mistake.

**Pisces:** it is not easy to face the demons of the past that could resurface with Jupiter in quadrature with the sun sign and the ascendant and with Saturn in conjunction with

your sun sign but also at the same ascendant. You have to be very strong and ask for help, support if you are not able to go on alone.
